COVID-19 Massage Preparedness

COVID-19

During this time of unprecedented uncertainty, we want to reassure you that we are following CDC guidelines and continue to take aggressive steps to reduce risks to our staff/patients/clients.

We are sanitizing all surfaces, equipment, work spaces, bathrooms and waiting areas thoroughly and frequently.

Massage Therapy COVID-19 Preparedness

At the beginning of your scheduled massage;

- you will be asked a series of COVID-19 related questions.
- you will be asked to wash your hands.
- your temperature will be taken.

We ask that you come alone or with only one parent/guardian.

Between each massage, the following will be cleaned and disinfected after each client;

- Door handles
- Chairs
- Light switches
- Counter tops
- Treatment table
- Face cradles
- Product dispensers

All sheets/blankets etc. will be changed and laundered after each use.

Your massage therapist will wear a mask for the duration of your massage. All clients must also wear a mask. You will not be required to wear a mask, if/when lying face-down during the massage.

If you have a medical condition that does not allow you to wear a mask then please speak with your massage therapist.
